

REVIVAL REMEDY - for emergency situations

Other registered names in use are *Rescue Remedy, Emergency Essence, Five Flower Essence etc.*

Revival Remedy is the only 'fixed' flower combination that Dr. Edward Bach, the founder of the BACH FLOWERS, developed himself and used successfully in all kind of emergency situations for his patients and himself. To date, it has helped countless people worldwide in minor or major emergency situations for over 80 years.

The harmonious interplay of these five flowers achieves a unique effect that allows us to cope with difficult situations calmly and confidently:

- * Stressful phases, relationship conflicts and excitement of all kinds
- * Minor accidents and their consequences
- * Bad news
- * Pain and physical weakness
- * Shocking news, shocks, accidents
- * Fear and crisis situations, after traumatic events ...

CHERRY PLUM (6) helps to let go, to calm the emotional turmoil within, to relax and to calm the breath;

Clematis (9) brings one back from a feeling of fainting or a kind of dream state where everything seems far away, by awakening our senses, clearing the mind, grounding us and bringing us back into the presence of the moment;

Impatiens (18) normalises the rhythm and tempo of breathing and heart activity and reduces stress and inner tension;

Rock Rose (26) gives us deep inner peace to face the situation with composure and to act thoughtfully and courageously;

Star of Bethlehem (29) counteracts shock and numbing and gives us comfort and confidence that the wounds will heal again.

Application of the Revival Remedy Essence, Spray and Cream

The emergency essence is available as **dropper bottle (10ml and 25ml)**, **spray (30ml)** and **cream (50 and 100 gram jar)**. It is useful to always have a bottle with you, whether you are travelling, going to work and shopping or participate in events and family gatherings.

Take a few drops yourself or give them to others in emergency situations **immediately** or **as soon as possible**. Apply them directly on the tongue or put them in a glass of water, so that a rapid calming effect can develop in the person concerned. **Take repeatedly a few drops or drink in sips until you feel calmer and find yourself again.** Depending on the severity, this may be necessary several times at increasing intervals. In case of fainting, drip the essence directly onto the lip, tongue, pulse, throat or forehead. Depending on the kind of experience, it may be necessary to continue taking 4 drops 4 times a day for several days or weeks. (For deep traumas maybe months.)

For **external use**, you can apply the essence to compresses or to partial and full baths. The **cream** is excellent for insect bites, cuts (applied thickly with a bandage or a finger stuck in the jar) and skin conditions and promotes healing for all external injuries. Even varicose veins have been relieved with the help of the cream. The **spray** can be applied **in the mouth** as well as **in the aura**. - *The more directly and quickly it is administered, the faster the healing and harmonisation will take place.*
